(1) Gross domestic product is the total value of all goods and services produced within a country in a year. It is often used to express wealth. PPS, purchasing power standard, is a unit representing an identical volume of goods and services in each country, irrespective of price levels. The value of 1 PPS unit corresponds roughly to 1 euro.

United in diversity: The European Union is made up of 28 European countries that share the same democratic values and are committed to working together for the common good. They have transferred specific powers to shared European institutions so that democratic decisions on questions of Europe-wide importance can be made at European level. At the same time, the EU is committed to safeguarding the diversity of European cultures and ways of life. Some other countries are candidates for EU membership.
